

Essential Health and Safety

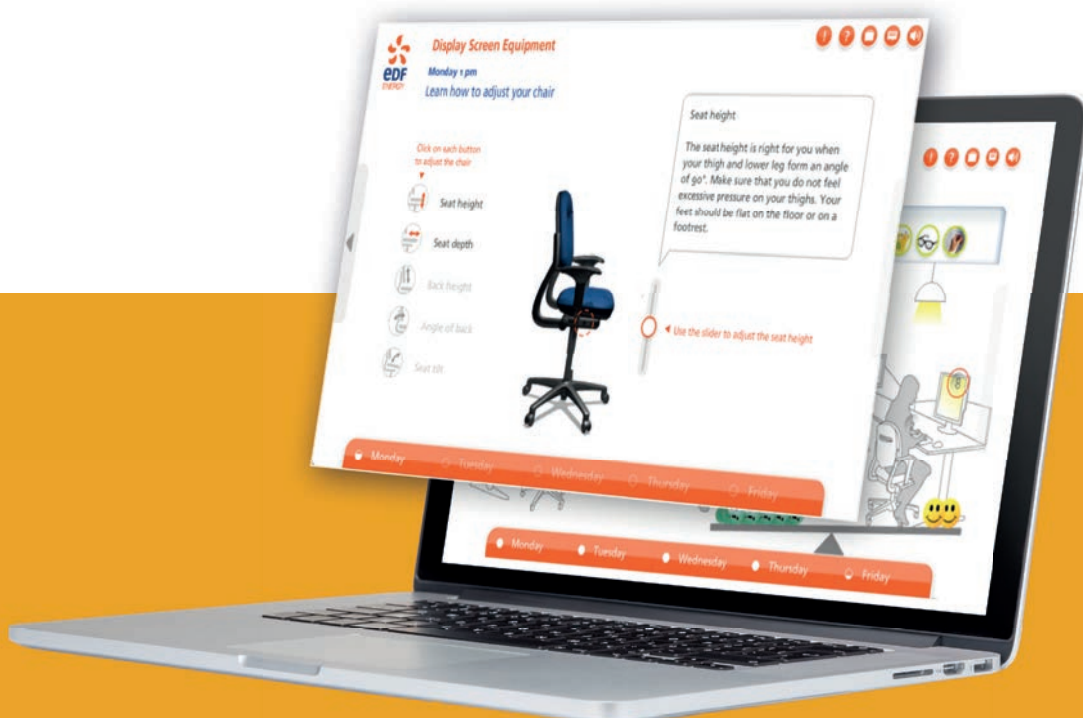

Kallidus has a long track record of developing compelling Health and Safety content. We typically use scenario-based learning to connect with learners and ensure they can relate to each element of the training. We work in partnership with our clients to understand their specific needs and the best way forward. We use the very latest learning design and immersive technology techniques, including gamification, storytelling and multi-media resources, to suit the learning objectives. All of our content is tailored to reflect our customer's brand identity and values.

EDF

EDF - Display Screen Equipment

We developed a display screen equipment training course to replace an outdated legacy course for EDF. We used a story-based approach to lead the learner through a week in their workplace in which they encountered several DSE related issues. The course also features an interactive game at the end of the course to embed key messages.

Display Screen Equipment

| | Monday | Tuesday | Wednesday | Thursday | Friday |
|-------|-------------------------------|---|--------------------------------------|-------------------------------------|----------------------------------|
| 8:00 | | Workstation: Some thinking time... | | | |
| 9:00 | Alex Johnson – Good posture | David: Screen | Look at different workstation setups | Maja: Laptops | |
| 10:00 | | Check out the eyestrain app | Ayesha: Tidy workstation | Maja: Other mobile devices | |
| 11:00 | | | Ayesha: Positioning equipment | Client visit with Maja | The challenge |
| 12:00 | | | | | |
| 13:00 | Learn how to adjust the chair | | | | |
| 14:00 | | | Alex: Tips on varying your posture | | Self evaluation: Final questions |
| 15:00 | Self evaluation: Chair | Self evaluation: Desk, keyboard & mouse | Ayesha: Your environment | | |
| 16:00 | | | Self evaluation: Working environment | | The end |
| 17:00 | | | | Train gets in: Personal safety tips | |
| 18:00 | | | | Self evaluation: Mobile working | |

Display Screen Equipment

Monday 9 am
Alex Johnson – Good posture

Alex works as an Occupational Health Advisor, she is a qualified ergonomist and runs yoga classes in the evenings.

It's no wonder she's read the chair manual from back to front.

The muscles at the bottom of the back are not being supported causing strain. The natural curve of the spine is also not being supported by the backrest.

Monday Tuesday Wednesday Thursday Friday

Essential Health and Safety

EDF

EDF - Stress Management and Awareness

EDF asked us to develop a course to increase awareness of stress and the role of EDF's Occupational Health Team in helping to manage stress. We designed a course using scenarios to bring the content to life, and ensure the learning has a very real and contextualised feel. Learners are introduced to a number of virtual work colleagues, each experiencing difficulties in their lives which are affecting their work. The learner has to decide if and when the Occupational Health Team needs to get involved. They then see the consequences of their decisions play out.

Essential Health and Safety

AstraZeneca - Fire Safety

We developed a course for AstraZeneca which introduces learners to the basics of fire safety. We used an immersive narrative to show a fire occurring on site. The learner is then taken back in time to discover why the fire started and how it could have been prevented.

AstraZeneca

Essential Health and Safety

AstraZeneca

AstraZeneca - Security, Health and the Environment

Kallidus developed a refresher course which was taken by all of AstraZeneca's auditors prior to conducting an audit. The e-learning was an integral part of a blended solution. We designed the course to simulate the complex audit process, allowing learners to practise real-world auditing skills in a virtual environment. The learners visit the site of Pharmacentrix after a process failure and have to conduct their own investigation into the matter. They use a virtual notepad to record their observations and actions which are used by their appraisers to evaluate and certify the learners as ready to audit.

Essential Health and Safety

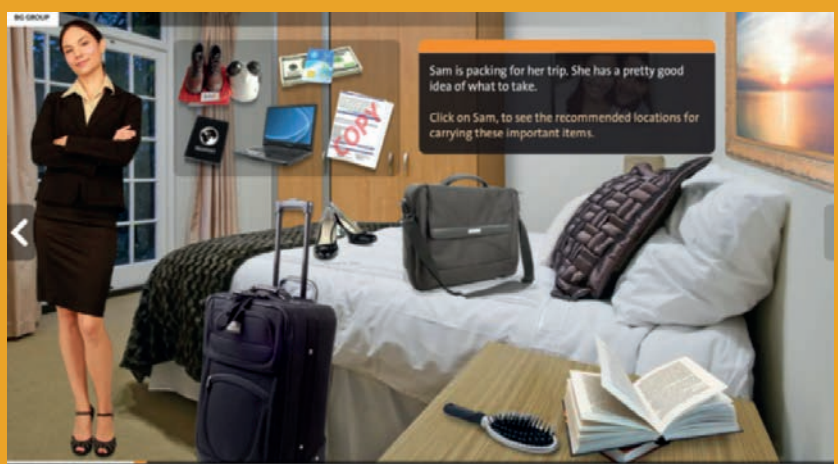

BG GROUP

BG Group

BG Group - Travel Health and Security

BG Group is a global business operating in the oil and gas sector. They have a truly mobile workforce with large numbers of their personnel regularly travelling worldwide to a wide variety of destinations. We developed a course to provide learners with the knowledge they need to prepare themselves for overseas travel. A key focus of the course was scenario-based learning.

Essential Health and Safety

YBS Group

YBS Group - Health and Safety Induction

We developed a health and safety induction course for YBS's entire workforce. The course features scenario-based learning and a gamified approach to inspire and engage learners. We used bespoke photography captured on-site at YBS locations to ensure an authentic learning experience. Learners are asked to spot risks and identify how these risks could be reduced.
